Forecast for Tuesday 17 Nov 2020

Weather: An area of rain will extend across most ranges bringing persistent heavy rain for much of the day with lighter more patchy rain in the east at times. Low cloud will probably be a hazard for all ranges. Rain will continue into the evening but clear the more southerly ranges. Strong winds and gales.

Chance of cloud free mountain/hill tops above 800m: For most hills 20% at best with extensive cloud based at 300m.

Visibility: For most areas visibility will be poor or even very poor at times in the rain, further east it will be moderate to start but even here it is likely to turn poor.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Widespread gales on the hills with some storm force gusts on the tops in the morning. Around the western ranges it will feel pretty cold in the persistent rain and gales. Some localised flooding may occur with some rivers reaching bankful after a day of persistent rain and very wet underfoot.

Forecast for Wednesday 18 Nov 2020

Weather: The main area of rain will move north in the early hours of Wednesday but another band of rain will push in from the west and spread east during the day. Initial rain will mostly clear into the afternoon with showers following behind. Freezing level will drop rapidly behind the rain so it will begin to feel a lot cooler in the afternoon and any showers will turn wintry on the munro tops. Gales continuing at height but beginning to ease in the afternoon.

Maximum wind: Southwesterly 45 gusts 55mph in the morning but easing to 30 mph gusts 40-45mph in the afternoon.

Chance of cloud free mountain/hill tops above 800m: In the west 30% with bases around 4-500m and in the east 60% with patches of cloud around 6-700m. During the afternoon cloud will break.

Visibility: It will be moderate or poor for much of the day.

Temperature: **Glens:** Plus 12 falling to 3 Celsius
At 800m: Plus 7 falling to 1 Celsius
Freezing level: Above the summits falling to 1000m
